

Release Date: April 17, 2023

Release Focus: Notarization & Mobile Improvements, and Bug Fixes

OVERVIEW

The Release 2023.04 consisted of various improvements and some bug fixes to improve functionality and the user experience. The items listed below are the highlights of this release.

Notarizations

- Users can now specify the user ID value through new parameters. This enhancement provides better controls and flexibility in assigning and managing users involved in the document tagging process.

Mobile

- Notaries now have the ability to move and resize text placed by Participants, improving flexibility and ease of use during the document signing process.
- Users will no longer be presented with the "Pay Fee" section from the Process Summary in the app for org > org transactions.

Bugs

- Various bugs have been fixed.
